# CUSTOMER COMMENT

**"Now this friendliness was not a phony, sort of forced friendliness that we often see. It was sincere and it was from EVERYONE, as if they truly loved their job and loved helping people."**

I am writing in hope that this will go to management in that I want to be sure they know what I witnessed and how I was dealt with on my visit there.

I visited the hill with my son on December 27. First, let me add, in this day it seems like customer service is lacking in some different businesses, that it's sometimes more the exception when you do great service.

However, from the minute I arrived there on Monday, every single employee there was top notch. They smiled, they were helpful, they were aware of everything going on around them. Extra kudos to the gentleman in the rental shop who was amazing in helping so many people with such ease and friendliness and treating each person like their situation was important as the next person. Now this friendliness was not a phony, sort of forced friendliness that we often see. It was sincere and it was from EVERYONE, as if they truly loved their job and loved helping people, from the person serving the French fries in the lodge, to the rentals, on the hill -- everybody made a complete genuine effort to make skiing a great experience. And they did, we had such a great day and it felt like one big group of friends, thanks to the employees you have up there. I was so impressed I wanted to send this note to whoever is responsible for this kind of management that can make this happen. We surely will be bringing our grandkids up there for a lesson. Best regards, Ian Brownlee

**Ian, thank you for taking the time to write! We shared your note with all of our managers and they have shared with their crews. The holiday period is busy and our employees work hard. Kind words like yours make a big difference. THANK YOU!**

**By the way, we wholeheartedly agree... our employees set the tone and make WP the best place to work and play!**
